EDUCATION

MKSSS's Cummins College of Engineering for Women, Pune

2024 - 2027

Bachelor of Engineering in Computer Science (9.07)

Pune

Government Polytechnic, Karad

2021 - 2024

Diploma in Computer Engineering (94.74)

Karad

Indira Kanya Prashala, Masur

2021

Secondary School Certificate (98.80)

Masur

EXPERIENCE

Cisco (9th Jun – 6th Aug)

2025

Internship (Technical Intern I)

Bengaluru

- **Gained Hands-on Experience in Load Balancing (IOS-XR)** - Worked within the Distributed System Engineering team to understand and explore load balancing mechanisms, focusing on performance and scalability in high-throughput router environments.
- **Improved Test Stability and Contributed to Production Code** - Resolved flaky test cases in Load Balancing General and Hashing Characterization modules by analyzing logs and identifying root causes. Implemented reliable fixes, raised detailed PRs, and ensured smooth integration through testing.

Happy Visitors Dot Com (15th July- 30th Aug)

2023

Industrial Training

Kolhapur

- Completed a 6-week full-time industrial training program focused on **Advanced trends in web development**, gaining practical knowledge in modern web technologies.
- Gained in-depth knowledge of web technologies like HTML and CSS, and acquired skills in hosting websites on servers, purchasing domains, and creating business accounts.

PROJECTS

Hostel and Attendance Management Application | *Java, XML, Firebase, OpenCV, Location API* | [Github](#)

- Uses OpenCV for face detection and location tracking to mark attendance with real-time logs.
- Manages mess choices and hostel room assignments with roommate details
- Admins post real-time announcements, and students can raise daily mess-related issues directly through the app for quick resolution.

Library Management System | *Java, SQL* | [Github](#)

- Developed a Java application using AWT and Swing packages to efficiently manage library records.
- Integrated MySQL server to store and maintain library data securely.
- Implemented features for inserting, updating, issuing, and returning book records seamlessly.

Handwriting Machine | *Arduino UNO, G-Code Generator*

- Designed and built a handwriting machine using the Arduino UNO board to write or draw on paper.
- Converted human-formatted text to G-Code using G-Code Generator and Inkscape for accurate writing on paper.

TECHNICAL SKILLS

Languages: Java, C, HTML/CSS, SQL, C++, Python

Developer Tools: VS Code, Eclipse, Android Studio

Relevant Coursework: DSA, DBMS, Object Oriented Programming, Operating System (Basic), Networking.

Technologies/Frameworks: MySQL, Android (Java), Load balancing, Pytest

ACHIEVEMENTS

- **Solved 150+ Problems across various platforms ([LeetCode](#), [CodeChef](#), [Hackerank](#), [GeeksforGeeks](#)).**
- Secured **2nd rank in IEEE MMCOE Ideathon**
- Achieved **1st position in the Avishkar Coding Competition** organized by the Government College of Engineering, Karad.
- Secured **2nd position in the Let Us C competition** held at Rajarambapu Institute of Technology.
- Secured **state rank 276** in Diploma Examination out of 49K+ Students.
